

*"Exploring is to travel through the unknown to learn or discover new information."* Kate Leeming

There are ten individual lesson plans that can be used as stand -alone lessons or as a sequence of lessons. Each lesson has been directly linked and embedded with the United Nations Sustainable Development Goals and focuses on the Learn, Think, Act strategy. The resources aim is for educators to use them in their own classrooms and to connect globally to educate, inform and inspire students so they can become our future leaders that can make informed decisions to create a better world.
